Seminar on
Engineering Education Research (EER): Status of Global Efforts and Opportunities

sponsored by the
National Science Council
National Ping Tung University of Science and Technology
Meiho Institute of Technology

in partnership with
Annals of Research in Engineering Education
Journal of Engineering Education
Rigorous Research in Engineering Education Initiative

Kaohsiung—Taipei, Taiwan • 2-5 February 2009

Jack R. Lohmann
Georgia Institute of Technology

Karl A. Smith
Purdue University and University of Minnesota
Overview
What are we going to do?

We assume you are here because either you are...
- engaged in EER and already have a strong interest in the topic, or
- interested in EER and want to be more personally engaged or encourage and support others to be engaged

Focus of the seminar
- Enhance awareness of the nature of engineering educational research
- Increase familiarity with the emerging global engineering education research community

Format of the seminar
- Reflection and small-group dialogue
- Presentation
- Reflection and whole group conversation

Resources
Introduction and reflective dialogue

- Your seminar speakers
- Individually, reflect on your engineering education research experience and interest, and reasons for your interest (~ 1 minute)
- Introduce yourself to a person nearby and share your thoughts (~2 minutes)
Why should we care about research in engineering education?

At M.I.T., Large Lectures Are Going the Way of the Blackboard

The Massachusetts Institute of Technology has changed the way it offers some introductory courses. Prof. Gabriella Sc biblical

By SARAH RUCKER
Published: January 12, 2009

CAMBRIDGE, Mass. — For as long as anyone can remember, introductory physics at the Massachusetts Institute of Technology was taught in a vast windowless amphitheater known by its number,
Reason Two: Faculty interest in higher levels of inquiry in engineering education

- **Level 0** Teacher
  - Teach as taught
- **Level 1** Effective Teacher
  - Teach using accepted teaching theories and practices
- **Level 2** Scholarly Teacher
  - Assesses performance and makes improvements
- **Level 3** Scholar of Teaching and Learning
  - Engages in educational experimentation, shares results
- **Level 4** Engineering Education Researcher
  - Conducts educational research, publishes archival papers

Rigorous Research in Engineering Education (RREE) – Streveler & Smith

• **RREE-1**
  - Funded by National Science Foundation (NSF), 2004-2006
  - One-week summer workshop, year-long research project
  - About 150 engineering faculty participated

• **RREE-2**
  - Funded by NSF, 2008-2011, Expanding and Sustaining Research Capacity in Engineering and Technology Education
  - Five short courses, WWW enabled learning environment

• **Goals**
  - Identify engineering faculty interested in conducting engineering education research
  - Develop faculty knowledge and skills for conducting engineering education research (especially in theory and research methodology)
  - Cultivate the development of a Community of Practice of faculty conducting engineering education research
Guiding principles for scientific research in education

1. Pose significant questions that can be investigated empirically
2. Link research to relevant theory
3. Use methods that permit direct investigation of the question
4. Provide coherent, explicit chain of reasoning
5. Replicate and generalize across studies
6. Disclose research to encourage professional scrutiny and critique

Source: Scientific Research in Education, National Research Council, 2002
Books, journals, online resources

- The Craft of Research
- Scientific Research in Education
- Journal of Engineering Education (JEE)
- Annals of Research on Engineering Education (AREE)
- See workshop presentation for additional resources
A growing global journal
8,500 subscribers, 70 countries, 5 partners

• **Founded in 1910**
  – “technical” journal/magazine for 80 years
  – mission refined in 1993 and again in 2003

• **Mission**
  – “...serve as an archival record of scholarly research in engineering education”

• **Manuscript types**
  – Research investigations
  – Research reviews

• **Six review criteria**

www.asee.org/jee
- Link journals related to engineering education
- Increase progress toward shared consensus on quality research
- Increase awareness and use of engineering education research
- Increase discussion of research and its implications

- **Resources- community recommended**
  - Annotated bibliography
  - Acronyms explained
  - Conferences, professional societies, etc.

- **Articles - education research**
  - Structured summaries
  - Reflective essays
  - Reader comments
An emerging global **community**
(Examples: Not an exhaustive list!)

- Engineering Teaching and Learning Centers
- Engineering Education Degree-granting Departments
- Engineering Education Societies and Organizations (logos shown)
- Engineering Education Conferences often with EER Sessions
Two special global efforts specifically to build community

• “Advancing the Global Capacity for Engineering Education Research” (AGCEER)
  • Joint effort JEE and EJEE
  • 10 sessions at 10 international conferences

• Research in Engineering Education Symposium (REES)
  • Retreat-like, research-only symposium
  • 2007, Honolulu, Hawaii; 2008, Davos, Switzerland; 2009, Queensland, Australia
Reflective dialogue and whole group conversation

- Individually, reflect on the presentation and note insights, applications, questions, etc. (~1 minute)
- Talk with a person nearby and develop a brief list of issues and questions (~2 minutes)
- Discussion as a whole group
Thank you!
