A Workshop on
Building Capability and Communities
in Engineering Education Research
sponsored by the
National Science Council
National Ping Tung University of Science and Technology
Meiho Institute of Technology
in partnership with
Annals of Research in Engineering Education
Journal of Engineering Education
Rigorous Research in Engineering Education Initiative

Kaohsiung—Taipei, Taiwan • 2-5 February 2009

Jack R. Lohmann
Georgia Institute of Technology

Karl A. Smith
Purdue University and University of Minnesota
Overview
What are we going to do?

• Welcome and introductions

• Topics of the workshop
  – Background and context
  – Features of engineering education research
  – Research questions and methodologies
  – Print and online resources
  – Global communities and their networks

• Format of the workshop
  – Interactive and team-based work
Who’s here?

- Your **workshop leaders**
- Introduce yourself to those near you
Background and Context
Workshop frame of reference

- **Workshop is about**
  - Identifying faculty interested in engineering education research
  - Deepening understanding of engineering education research
  - Building engineering education research capabilities

- **Workshop is NOT about**
  - Pedagogical practice, i.e., “how to teach”
  - Convincing you that good teaching is important
  - Writing engineering education research grant proposals or papers
  - Advocating all faculty be engineering education researchers
Levels of inquiry in engineering education

- **Level 0** Teacher
  - Teach as taught
- **Level 1** Effective Teacher
  - Teach using accepted teaching theories and practices
- **Level 2** Scholarly Teacher
  - Assesses performance and makes improvements
- **Level 3** Scholar of Teaching and Learning
  - Engages in educational experimentation, shares results
- **Level 4** Engineering Education Researcher
  - Conducts educational research, publishes archival papers

Some history about this workshop

- **Rigorous Research in Engineering Education (RREE1)**
  - One-week summer workshop, year-long research project
  - Funded by National Science Foundation (NSF), 2004-2006
  - About 150 engineering faculty participated

- **Goals**
  - Identify engineering faculty interested in conducting engineering education research
  - Develop faculty knowledge and skills for conducting engineering education research (especially in theory and research methodology)
  - Cultivate the development of a Community of Practice of faculty conducting engineering education research
RREE Approach

Theory
(study grounded in theory/conceptual framework)

Research that makes a difference . . . in theory and practice

Research (appropriate design and methodology)

Practice (implications for teaching)

http://inside.mines.edu/research/cee/ND.htm
Research can be inspired by ...

<table>
<thead>
<tr>
<th>Understanding (Basic)</th>
<th>Use (Applied)</th>

</thead>
<tbody>
<tr>
<td>Yes</td>
<td>Pure basic research (Bohr)</td>
</tr>
<tr>
<td>No</td>
<td>Pure applied research (Edison)</td>
</tr>
</tbody>
</table>

Follow-up proposal has been awarded (RREE2)

- Includes a series of 5 short courses
  1) Fundamentals of Educational Research
  2) Identifying Theoretical Frameworks
  3) Designing Your Research Study
  4) Collaborating with Learning and Social Scientists
  5) Understanding Qualitative Research
- To be available on the WWW as they become available
Today’s objectives

1) Identify principal features of engineering education research

2) Frame and situate research questions and methodologies

3) Gain familiarity with several print and online resources

4) Become aware of global communities and their networks
Objective 1

Identify principal features of engineering education research
What does high-quality research in your discipline look like?

• What are the qualities, characteristics, or standards for high-quality research in your discipline?

• Think of it this way: “Research in my field is high-quality when....”

 בכתב יד: Individually, list the qualities, characteristics or standards in your discipline

כתב יד: Compare your lists, and as a group, develop a list of high-quality research qualities, characteristics or standards
What does high-quality research in your discipline look like?

- (Workshop list)
- (Workshop list)
What does education research look like?

• What are the qualities, characteristics, or standards for high-quality education research?

   Individually, list:

   1) Which qualities, characteristics, or standards identified so far DO NOT apply?

   2) What qualities, characteristics, or standards can you envision that are DIFFERENT for education research?

   As a group, combine your lists.
What does education research look like?

- (DO NOT apply list)
- (DIFFERENT list)
Guiding principles for scientific research in education

1. Pose significant questions that can be investigated empirically
2. Link research to relevant theory
3. Use methods that permit direct investigation of the question
4. Provide coherent, explicit chain of reasoning
5. Replicate and generalize across studies
6. Disclose research to encourage professional scrutiny and critique

• How do our lists compare with the NRC six?
• Is a global list possible? Do cultural contexts matter?

The research process and reasoning

Practical Problem and helps Research Answer
leads to Research Problem
Research Question
motivates
informs
Research Answer

Research Process

Claim → Reason → Evidence
Warrant
Acknowledgment and Response

The Craft of Research
Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams

Third Edition
Objective 2
Frame and situate research questions and methodologies
Which comes first: framework or observation?

- **Going from framework to research question to research study**
  - e.g., the experiential learning cycle

- **Going from observation to framework to research question to research study and back to observation**
  - e.g., classroom community

  - Please describe observations that have sparked your curiosity
Most common frameworks in educational research

- Theories of learning
- Theories of motivation
- Theories of development
- Theories of contextual effects

See Marilla Svinick’s slides—Conceptual frameworks: Finding a conceptual framework that is appropriate for your question. RREE-D2-Marilla-conceptual1.ppt
1. Find and follow your dream.
2. Find and build community.
3. Do your homework. Become familiar with engineering education research.
4. Remember what it is like to be a student—be open to learning and the associated rewards and challenges.
5. Find balance. You will feel like you have multiple identities.
6. Be an architect of your own career.
7. Wear your researcher “lenses” at all times.
8. Use research as an opportunity for reflective practice.
Objective 3
Gain familiarity with several print and online resources
Books, journals, online resources

- The Craft of Research
- Scientific Research in Education
- Journal of Engineering Education (JEE)
- Annals of Research on Engineering Education (AREE)
- Thomson ISI Citation Index
- Some other journals
A growing global journal
8,500 subscribers, 70 countries, 5 partners

- **Founded in 1910**
  - “technical” journal/magazine for 80 years
  - mission refined in 1993 and again in 2003

- **Mission**
  - “…serve as an archival record of scholarly research in engineering education”

- **Manuscript types**
  - Research investigations
  - Research reviews

- **Six review criteria**

**NOTE!**
"The Relationships Between Students’ Conceptions of Learning and Their Preferences for Classroom and Laboratory Learning Environments," by Chia-Ching Ling and Chin-Chung Tsai, National Taiwan University of Science and Technology, to appear in the *Journal of Engineering Education*, April 2009
- Link journals related to engineering education
- Increase progress toward shared consensus on quality research
- Increase awareness and use of engineering education research
- Increase discussion of research and its implications

- **Resources - community recommended**
  - Annotated bibliography
  - Acronyms explained
  - Conferences, professional societies, etc.

- **Articles - education research**
  - Structured summaries
  - Reflective essays
  - Reader comments
Thomson ISI Citation Index

- **Thomson ISI** (Institute for Scientific Information)
- **Science Citation Index**
  - Category: Education, Scientific Disciplines
  - 23 journals in medicine (10), engineering (7), and science (6)
- **Social Science Citation Index**
  - Category: Education and Educational Research
  - 105 journals, including education (52), social sciences (28), natural science (9), medicine (6), engineering (1, JEE), other (9)

Objective 4

Become aware of global communities and their networks
An emerging global community

- Groups, centers, departments
- Engineering education societies
- Forums for dissemination

What follows is a sample — it is NOT an exhaustive list!
Groups, centers, departments...

**Engineering Teaching and Learning Centers** — Australia: UICEE, UNESCO International Centre for Engineering Education; Denmark: UCPBLEE, UNESCO Chair in Problem Based Learning in Engineering Education; South Africa: CREE, Centre for Research in Engineering Education, U of Cape Town; Sweden: Engineering Education Research Group, Linköping U; UK: ESC, Engineering Subject Centre, Higher Education Academy; USA: CELT, Center for Engineering Learning and Teaching, U of Washington; CRLT North, Center for Research on Learning and Teaching, U of Michigan; Faculty Innovation Center, U of Texas-Austin; Engineering Learning Center, U of Wisconsin-Madison; CASEE, Center for the Advancement of Scholarship in Engineering Education, National Academy of Engineering.

**Engineering Education Degree-granting Departments** — USA: School of Engineering Education, Purdue U; Department of Engineering Education, Virginia Tech; Department of Engineering and Science Education, Clemson U; Department of Engineering and Technology Education, Utah State U; Malaysia: Engineering Education PhD program, Universiti Teknologi Malaysia; India: National Institute for Technical Teacher Training and Research.
Engineering education societies...

**Societies with Engineering Education Research Interests** — Indian Society for Technical Education, Latin American and Caribbean Consortium of Engineering Institutions, Asociación Nacional de Facultades y Escuelas de Ingeniería (National Association of Engineering Colleges and Schools in Mexico), Internationale Gesellschaft für Ingenieurpädagogik (International Society for Engineering Education), International Federation of Engineering Education Societies
Conferences with engineering education research presentations:

- **ASEE** — Annual Conference, American Society for Engineering Education, see www.asee.org
- **AAEE** — Annual Conference, Australasian Association for Engineering Education, see www.aaee.com.au
- **GCEE** — Global Colloquium on Engineering Education, sponsored by ASEE and local partners where the meeting is held, see www.asee.org
- **SEFI** — Annual Conference, Société Européenne pour la Formation des Ingénieurs, see www.sefi.be
- **REES** — Research on Engineering Education Symposium, rees2009.pbwiki.com/

New! (Started 2007)
Thank you!
